

# Combat Complex Cybersecurity Challenges and **Reduce Risk**

## Make Informed Risk Decisions While Enabling Business Operations

Persistent and sophisticated threat actors, digital transformation, and evolving regulatory and industry requirements are all challenges faced by overburdened security teams. We can help you ensure you effectively balance these demands and keep business running smoothly.

Our Security Consulting team provides expert-level oversight and guidance, addresses tactical security objectives and develops strategic plans that adhere to your timeline and budget. Our Security Consulting services include expertise across these functions:

- **Application Security**
- **Governance, Risk & Compliance**
- **Cloud Security**
- **Identity & Access Management**
- **Digital Forensics & Incident Response**
- **Threat & Attack Simulation**

### Comprehensive and Tailored Services

We help improve all aspects of your Security Program, and customize our assessments to address your unique challenges.

### Real-World Security Guidance

Our deep operational experience as security practitioners enables us to provide realistic recommendations and further guidance after the engagement is complete.

### One Team from Pre-Sales to Delivery

The team that scopes and tailors the project to your needs also delivers the engagement and provides ongoing support.

### We Build for a Long-Term Partnership

After an engagement is complete, we don't simply hand you a report; we put you in position to achieve your objectives.

## Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

Our highly-certified practitioners have built Security and Compliance programs in the U.S. Federal Government as well as Fortune 500 companies.

## Hundreds of Industry and Product Certifications

# GuidePoint Security Consulting services include:

## Application Security

We provide strategic and tactical services in order to identify and address application-related issues before they reach production, improving your application security posture and reducing the cost of remediation.

## Cloud Security

We provide cloud-specific services that cover Security Operations, Compliance and Architecture in order to help you gain control of your cloud environment with a "Security First" strategy.

## Digital Forensics & Incident Response

We help you to proactively prepare for an incident, test your plan, and respond quickly and comprehensively in the event of an incident - allowing you to get you back to business.

## Governance, Risk & Compliance

We help ensure your information security program is optimized to meet today's complex cyber risks while aligning with industry best practices, regulations, and compliance mandates.

## Identity & Access Management

We assess your environment, work with you to develop a strategy and roadmap, and evaluate, select, implement and maintain IAM solutions that best fit your environment and business needs.

## Threat & Attack Simulation (TAS)

We assess your resilience against attackers by conducting advanced adversary emulation exercises that are tailored to your objectives - ensuring that your security controls are working effectively.

With all the moving parts that go into a full security program, defining and executing a comprehensive plan can be a difficult task. **GPVUE** leverages our expertise across all of the cybersecurity disciplines our Security Consulting practice offers to provide an **integrated** program that is designed specifically to meet the unique security needs of your organization. Find out how GPVUE can help you build your best security program today.
