

# Improve the Strengths, Expertise and Training of Your Security Teams

Security tools are only as effective as the people and teams that use them.

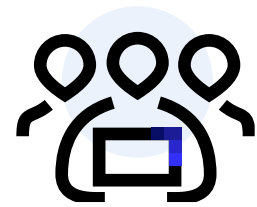

Employee knowledge and skill can often be the greatest bottleneck in any security program. A full understanding of how security technologies are used can only be gained through hands-on experience.

Red and Blue team exercises provide valuable insights into the effectiveness of your security program, but when deficiencies arise due to lack of knowledge, improvement can be hard to come by.

GuidePoint Security's Capture the Flag Services bring a different perspective into offensive and defensive security, designed to educate practitioners and provide them with more knowledge of offensive tools, tactics and procedures. Problems that are unique to your organization are translated into custom challenges that test your teams' capabilities and proficiencies.

## CTF Service Benefits:

- ✓ Fully functional, tailored lab environment to aid your education
- ✓ Access to the challenges and backend infrastructure
- ✓ Bird's eye view of the participant's security strengths and weaknesses
- ✓ Evaluate potential candidates for hiring or advancement based on the results of their lab time
- ✓ Challenge participants to evaluate real-world problems and help understand how they can be remedied in a production environment

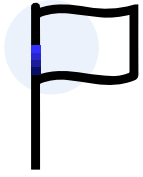

## Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

GuidePoint's Threat & Attack Simulation team is staffed by professionals who are technically adept and possess a diverse set of collective skills, enabling them to be extraordinarily adaptable to all security assessments.

## Hundreds of Industry and Product Certifications

# Custom Challenges to Ensure Your Team is Up to the Task

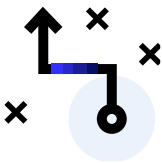

GuidePoint's Capture the Flag Services bring a different perspective into offensive and defensive security with four main services:

## Cyber Range

A lab environment where security practitioners can expand their knowledge of new attacks and defenses with methodologies that are similar to their production environment.

## Capture the Flag Competitions

Challenge events where individuals or teams compete against one another in a "Jeopardy-style" game, solving real-world hacking problems in a lab environment.

## Challenge Labs for Evaluations

Labs where managers can evaluate the technical aspects of their new hire or promotion candidates before, during or after the initial technical interview.

## Custom Services

Purpose-built labs to meet your unique requirements and specifications. Contact us to discuss your inquiry.

## About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
