

ARTIFICIAL INTELLIGENCE AT GUIDEPOINT SECURITY

Secure AI and Use AI to Secure What Matters

AI promises greater efficiency, faster innovation, and improved threat detection and response. However, it also introduces new cybersecurity risks, compliance concerns and potential blind spots that undermine its business value.

Accelerate innovation and maximize security with a strategic approach to implementing and optimizing AI within your IT workflows. GuidePoint Security helps organizations adopt and govern AI technologies intelligently to accelerate success, find and neutralize threats faster, and safeguard data and assets against AI-driven attacks. Our experts empower you to harness AI's full potential securely and responsibly, so you can move faster, operate safer, and make smarter decisions.

Turn AI Risk Into a Strategic Advantage

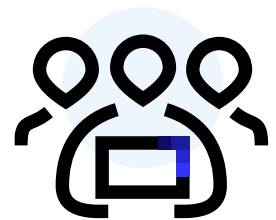

GuidePoint Security helps you turn AI from a security risk into a strategic advantage. Our elite team provides comprehensive cybersecurity technical and advisory services that help organizations securely and confidently incorporate AI technologies into your IT environment, and use AI to bolster threat hunting. These services address the key challenges that drive organizational adoption, including the need to:

- ✓ Accelerate business results - innovation, productivity, time to market, and cost savings
- ✓ Speed threat hunting, detection, and response
- ✓ Effectively combat or prevent AI-based threats
- ✓ Make more informed and accurate decisions

Together, we can securely and responsibly supercharge your business. Our team of highly certified cybersecurity experts can help you deploy, optimize, and govern AI solutions. We make it easy to integrate AI into your workflows to minimize risk and maximize impact — so you move faster, smarter, and safer.

Our team of highly certified cybersecurity experts:

- Improve overall security posture
- Quickly detect and shut down AI-based security threats
- Fast-track AI adoption, while ensuring regulatory compliance and architectural security
- Control shadow AI with visibility and governance
- Protect sensitive data and identities
- Improve visibility across users, data, and systems
- Ensure ethical, transparent AI behavior
- Align with compliance and business objectives

Put a Highly-Trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

Securely and Confidently Embrace AI

GuidePoint Security works closely with you to understand your specific business needs and challenges, and tailor a solution that aligns with your goals and budget. We prioritize staying up to date with the latest technologies, solutions and threats so we are best able to guide your organizations to address the evolving threat landscape. Instead of focusing on specific technologies, we will look across the cybersecurity ecosystem and recommend the best-fit solutions. Our technical and advisory services include:

Strategic Advisory

Build a secure, business-aligned AI roadmap. We help you assess AI readiness, select the right vendors, and guide deployment to reduce risk, support compliance, and accelerate transformation.

AI Governance

Establish frameworks that support responsible AI use. Our team helps define policies, ownership models, and controls that align with standards NIST AI RMF or ISO 42001.

Risk Mitigation

We help identify risks introduced by AI, streamline security controls, and optimize processes to reduce exposure and support scalable AI adoption.

Data Privacy and Protection

Safeguard sensitive data throughout the AI lifecycle. We apply consistent scanning, classification, encryption, and access controls to ensure AI models meet compliance, privacy, and security requirements.

AI-driven Threat Response

Prepare for AI-fueled attacks. We develop incident response playbooks, tune AI-enabled detection tools, and apply behavioral analytics to keep you secure.

Why GuidePoint Security

AI brings incredible potential to businesses - both to organizational success and defense. Realize the full power and potential of AI within your organization with GuidePoint Security. We help organizations of every size and industry design, deploy, deliver and govern AI solutions that safeguard data and assets and accelerate business success. We help you integrate solutions across any environment—faster, smarter, and with less risk – to strengthen your defenses. Accelerate your business with confidence—and protect what matters most.

About Us

GuidePoint Security provides proven cybersecurity expertise, solutions, and services to help organizations make better business decisions. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet-level agencies to improve their security posture. Our partnership makes us your trusted advisor — not just another service provider.
