GUIDEPOINT® SECURITY

Prepare For, Respond To and Efficiently Resolve Security Incidents to Minimize Business Impact.

Cyber incidents happen. We can help you quickly investigate and understand the full scope of an incident.

We leverage your existing toolsets and data sources in conjunction with supplemental solutions that can be deployed as part of the IR engagement to achieve full visibility across your environment and ensure current and historical situational awareness.

With Our DFIR Services... You're Covered

From business email compromise and ransomware activity, to APT and nation-state sponsored attacks, our team has experience across the spectrum of incidents you might face.

Core Competencies

Core knowledge areas and capabilities used to perform an investigation include:

- Network traffic analysis
- Log collection and review
- Host analysis and mass triage of forensic artifacts
- Malware analysis and reverse engineering
- Forensic disk imaging, memory acquisition and review
- Current and Advanced Threat Intelligence Integration
- SaaS application log review
- Cloud-based Threat Analysis

Key Benefits

- Highly skilled IR practitioners deliver consistent customer experience and results
- Platform and product agnostic with the ability to provide supplemental tools as needed
- Comprehensive methodology to ensure effective and fast response
- Pre-approved by most major cyber insurance carriers, and extensive experience with Legal Counsel

Put an ELITE Team of Cybersecurity Practitioners on Your Side

Our dedicated IR practitioners are experienced with a wide variety of industry standard tools and solutions that provide the required visibility across your network, endpoints, and other systems to perform efficient and comprehensive investigation of an incident.

Hundreds of Industry and Product Certifications

GCFE · GSE · GCFA · GSEC
