

PURPLE TEAM ASSESSMENT SERVICES

Collaborative Security Validation That Makes Security Teams Stronger

Organizations invest heavily in detection and response capabilities but rarely get the opportunity to validate and sharpen those capabilities against realistic, coordinated attack scenarios in real-time.

By uniting offensive simulation and defensive practices in a single, coordinated engagement, GuidePoint's Purple Team Assessment service reveals where detection and response capabilities fall short and where they shine. Through collaborative exercises that put security defenses, processes, and analysts teams to the test, our certified offensive security experts prepare organizations before the real threats hit. Each Purple Team Assessment works in real-time, delivering tactical and strategic guidance that helps teams measurably improve end-to-end incident response throughout the simulation.

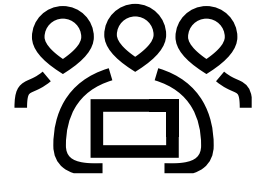

Stronger Teams. Sharper Defenses.

Most security testing tells organizations where the gaps are. A Purple Team Assessment goes a step further by embedding security experts in the room to close gaps in real-time.

GuidePoint Security's Purple Team Assessment unites Threat and Attack Simulation (TAS) and Digital Forensics and Incident Response (DFIR) expertise into a single, coordinated engagement. Offensive security professionals execute realistic attack scenarios while defensive experts work side-by-side with the organization's security operations and incident response staff. Together, this team helps validate detection coverage, refine response procedures, and build knowledge as the engagement unfolds.

Every scenario is shaped around the organization's environment, industry, infrastructure, and existing security capabilities to:

- ✓ **Discover visibility gaps** in monitoring and alerting before they become liabilities
- ✓ **Validate that security controls perform** as intended against coordinated attack scenarios
- ✓ **Sharpen analyst skills** through direct, hands-on collaboration with offensive and defensive experts
- ✓ **Reduce time to detect and contain threats** through process validation and real-time coaching
- ✓ **Build investigative capabilities** that strengthen the security program long after the engagement ends

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and U.S. intelligence agencies.

The Best Defense is a Team That's Ready

GuidePoint Security's Purple Team Assessments are structured, three-phase engagements. This proven process maximizes the development of the organization's security capabilities at every step from careful team preparation through expert test facilitation to the delivery of impactful insights and recommendations.

Why GuidePoint Security

When cyber threats target the organization, the best defense is a security team that is practiced and ready. GuidePoint Security designs and delivers tailored Purple Team assessments that drive real results across any environment — building stronger analysts, sharper processes, and more resilient defenses. Accelerate security program maturity with confidence and protect what matters most

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
