

## CYBERSECURITY SERVICES FOR HEALTHCARE

# Cybersecurity Tailored to the Realities of the Healthcare Industry

Threat actors target the Healthcare Industry for its sensitive data. Often challenged by resources and legacy systems, it can be difficult to secure its complex network of devices, users and systems.

Cyber threats impact patient safety, data integrity, and system availability. GuidePoint Security helps healthcare organizations assess risk across critical clinical systems, connected users and devices, cloud, and AI to deliver solutions that safeguard data, patient care delivery, and operations. We help strengthen resilience, reduce uncertainty, and ensure your organization can prevent, withstand, and recover from evolving threats — so you can protect your organization and keep critical systems running.

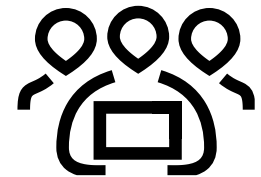

## Reduce Risk. Maintain Operations. Protect People.

Healthcare is consistently a top 5 target for attacks. Its increased reliance on Electronic Health Records (EHR) and resource constraints mean there's high value data to protect.

To many U.S. hospitals, clinics, and healthcare, insurance, pharmaceutical, and medical device companies, GuidePoint Security is the trusted advisor and partner that keeps data and assets secure and systems online. We reduce real-world cyber risk, strengthen resilience, and ensure security investments align with business and patient care outcomes, even operating within budget constraints.

GuidePoint experts help clients navigate complex IT/OT/IoT landscape, secure AI, and meet regulatory compliance in connected device ecosystems. Our team will validate controls, ease audit burden, and improve response and recovery to maintain secure, continuous operations and deliver safe, reliable patient care without disruption. We provide:

Expertise to Reduce Real-world Risks	Outcome-focused Services	Adaptable Solutions
We align security strategy to operational, clinical, and regulatory priorities, and budget realities. Our hands-on expertise can identify, prioritize, and reduce risks that could impact patient care and operations.	We help you navigate the cybersecurity landscape. Our vendor-objective approach ensures a tailored security program that supports your business goals and eliminates wasted spend on tools that don't reduce risk.	We design and implement flexible security solutions that work across the entire ecosystem so healthcare organizations stay resilient, even as technology, threats, and regulations evolve.

## Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War and U.S. intelligence agencies.

# Cybersecurity that Keeps Healthcare Securely Moving Forward

GuidePoint Security has heavily vetted over 800 solutions so we can provide objective guidance and architect tailored security solutions for our clients' unique environments. We help organizations with:

## ✓ Compliance

Our experts understand critical nuances in this highly regulated industry. We ensure systems and procedures adhere to regulatory standards and compliance reporting requirements.

## ✓ SOC Modernization

We improve SOC outcomes via continuous monitoring, automated threat detection, and accelerated response capabilities. Our services improve visibility, reduce dwell time, and strengthen overall resilience.

## ✓ Data Governance

We improve data discovery, classification, and protection, and establish consistent security controls to address the modern data risk realities – unprecedented growth, widespread unstructured data sprawl, evolving regulatory pressure, and increasing AI and data use.

## ✓ Device Security

Our experts help improve asset visibility and control, strengthen network segmentation, accelerate incident response, and build solid access management strategies that protect patient data and care delivery.

## ✓ Staff Augmentation

For clients with limited resources or expertise, GuidePoint offers on-demand expert services across all cybersecurity domains.

## ✓ Ransomware Response

GuidePoint experts guide clients through incident response planning, ransomware negotiations, crisis communications, data recovery, and incident forensics and response.

## ✓ AI Innovation

We help you securely adopt AI. GuidePoint can architect AI Governance programs; enhance AI discovery; evaluate, deploy and optimize AI-based solutions; provide training; and establish data protection and data leak management and monitoring solutions.

## ✓ Business Resilience

GuidePoint business resilience services help establish and validate business continuity and disaster recovery strategies to ensure business keeps running when disruptions occur.

## ✓ Third-party Risk Management

Third-party access shouldn't be your weakest link. We build strategies to reinforce and protect interconnected networks with identity and access management solutions, network segmentation, API security, and governance.

## ✓ Identity Convergence

We help adopt zero trust principles and expand digital services to establish a unified approach to identity and access management for users, devices, AI agents and machines working across various environments.

## ✓ Application Security | DevSecOps

Identify and remediate risk early, without slowing innovation, by embedding security throughout the software development lifecycle.

## ✓ SaaS Security

We help maximize visibility into SaaS environments to reduce risk, protect data and strengthen regulatory compliance. GuidePoint's vendor-objective approach embeds security directly into SaaS operations, delivering measurable protection and organizational resilience.

## Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored cybersecurity solutions for Healthcare organizations that drive real results. We integrate solutions across any environment – faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence – and protect what matters most.

## About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
