

Achieve Your Best IAM End-state

Improperly implemented identity and access management programs can lead to cost overrun, breaches, and tool implementation failures.

Better control user access to critical information and systems without slowing business operation by optimizing your Identity and Access Management (IAM) solutions. GuidePoint Security IAM Advisory Services elevate your security posture and strengthen your defenses. Whether you need a prioritized roadmap for IAM success or help with a specific IAM issue, GuidePoint experts will guide you to a more effective and efficient IAM program.

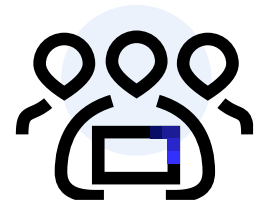

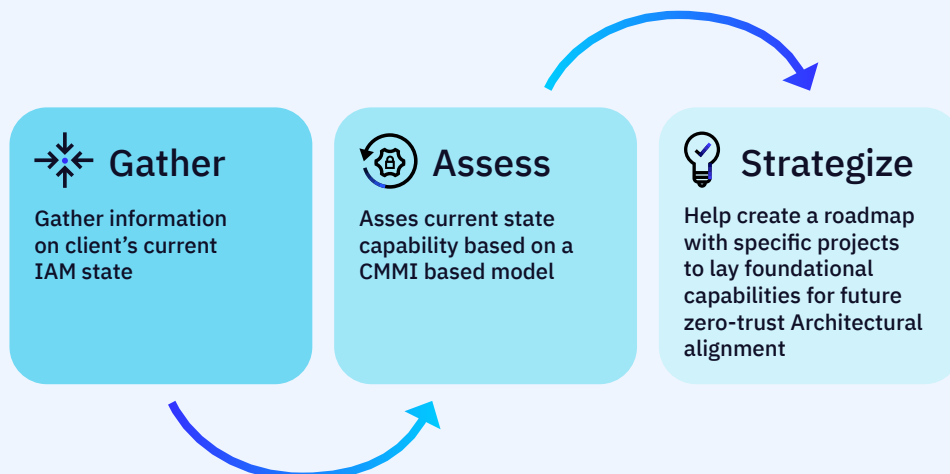

Control Access to Critical Data and Systems

Many security incidents are the result of stolen or compromised credentials, poor access controls and improper access configurations. It's critical to define processes and implement the right solutions to manage accounts and monitor access.

The GuidePoint Security IAM Advisory team serves as a strategic and governance-focused function to help guide your Identity and Access Management (IAM) initiatives. We ensure that your IAM capabilities effectively support business objectives, regulatory compliance, and cybersecurity risk management across the organization.

Our expert Identity and Access Management consulting team will evaluate your current IAM program state, identify gaps, assess your program maturity and provide a long-term identity roadmap and solution blueprint to take your IAM program to its full potential.

Our goal is to improve data management and system access, while also balancing security with the tools teams need to achieve your business goals. This helps organizations better control access to sensitive data and systems, and mitigate risk.

Put a Highly-Trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

Hundreds of Industry and Product Certifications

Strengthen Identity and Access Management Across the IAM Lifecycle

Our IAM methodology outlines best practices to provide organizations such as yours with custom-fit and effective IAM solutions. GuidePoint IAM Advisory Services can help increase IT efficiency, worker productivity, and strengthen GRC and cybersecurity initiatives. Achieve your best possible IAM program end-state with:

Governance & Organizational Alignment

Stakeholder identification, alignment of IAM goals with business objectives

User Lifecycle Management and Access Certification

Joiner, leaver, mover lifecycle processes and access certification for human and non-human identities

Privileged Access Management

Monitoring, management, and protection of privileged accounts and/or entitlements

Authentication

Centralized vs decentralized authentication, single sign-on, federated single sign-on, MFA, adaptive authentication

Authorization, Role and Policy Management

Role definition and management, SOD policies, entitlement management

Audit, Reporting, Monitoring & Analytics

Auditing and reporting capabilities, Analytics for as-hoc reporting and role analysis

We provide expert guidance, governance, and strategic oversight to design, implement, and evolve secure, scalable, and business-aligned IAM capabilities for our clients.

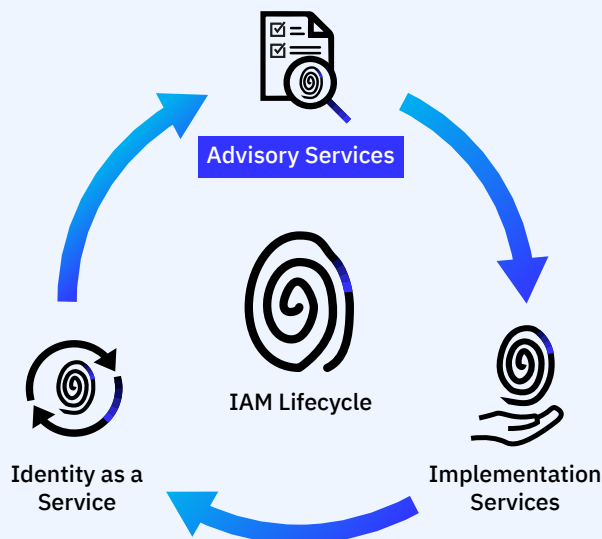

Why GuidePoint Security

GuidePoint IAM Services ensure you always have a trusted advisor on your side. GuidePoint Security helps organizations proactively shore up their IAM defenses. We design, deploy, and deliver tailored IAM and cybersecurity solutions that drive real business impact. We integrate solutions across any environment—faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence—and protect what matters most.
