

SAAS SECURITY SERVICES

Safeguard Your SaaS Ecosystem with Comprehensive Security Solutions

As threat actors evolve with increasing rapidity, managing and securing SaaS platforms is more critical than ever.

Organizations face unique challenges in ensuring their SaaS environments are secure, compliant, and efficiently managed. GuidePoint Security offers a holistic approach to SaaS security, providing tailored solutions that address these challenges and safeguard your business operations.

GuidePoint Security's SaaS security offerings provide a robust, mature model for securing SaaS environments, managing potential threats, and effectively governing your SaaS portfolio. Our solutions are designed to help you achieve long-term security and compliance.

Key benefits of our services:

- ✔ **Enhanced Security Posture:** Gain a comprehensive understanding of your SaaS platform's security status, ensuring all configurations align with industry standards.
- ✔ **Improved Governance:** Establish consistent governance models to better manage and oversee your SaaS portfolio.
- ✔ **Risk Mitigation:** Proactively identify and address potential security threats, reducing the risk of breaches and compliance violations.
- ✔ **Efficient Vendor Management:** Streamline the onboarding and review process for SaaS vendors, ensuring only secure platforms are integrated.
- ✔ **Data Protection:** Ensure sensitive data within SaaS platforms is properly managed and classified, reducing the risk of data breaches.
- ✔ **Identity and Access Control:** Implement consistent and secure identity and access management practices across all SaaS platforms.
- ✔ **Strategic Insights:** Receive detailed assessments and recommendations to continuously improve your SaaS security program.

Put a Highly-Trained, **ELITE** Team on Your Side

GuidePoint's Cloud Security Practice is comprised of highly certified SaaS Security, AWS, Azure, and Google Cloud experts who have developed and led some of the largest cloud security initiatives at Fortune 500 companies.

GuidePoint's SaaS Security services include:

SaaS Security Health Check

A thorough review of the technical configurations of your SaaS platforms. Utilizing the Cloud Security Alliance's Cloud Controls Matrix, we assess the security posture of targeted SaaS platforms.

SaaS Security Assessment

A comprehensive evaluation of the overall security posture of your SaaS platforms, including technical configurations, strategic security practices, and alignment with best practices.

SaaS Security Program Assessment

A holistic review of your SaaS security program's practices and policies, evaluating existing policies, procedures, and practices to identify gaps and areas for improvement.

Salesforce Security Services

Specialized services to assess, implement, and secure Salesforce environments. Includes security assessments, configuration reviews, and implementation of security measures.

ServiceNow Security Services

Tailored services to ensure the security of ServiceNow platforms. Involves security assessments, configuration reviews, and strategic implementation of security practices.

Workday Security Services

Comprehensive security services for Workday environments, involving detailed security assessments, configuration audits, and the implementation of robust security controls

Third-Party SaaS Vendor Assessments

Evaluations of SaaS vendors to identify and mitigate potential risks. Involves detailed assessments of vendor security controls, documentation of the shared responsibility model, and evaluation of the vendor's cloud architecture.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
