

# Visibility, Control, and Security for IoT & IIoT

Organizations lack visibility and control over rapidly proliferating managed and unmanaged IoT and IIoT devices, creating significant security blind spots and additional regulatory pressure.

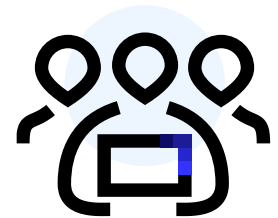

Regain visibility and control over your Internet of Things (IoT) and Industrial IoT (IIoT) ecosystem with GuidePoint Security. Our comprehensive assessments identify blind spots while our strategic remediation plans eliminate vulnerabilities. We help organizations meet regulatory requirements without disrupting operations, and transform IoT and IIoT devices from security liabilities into protected assets within a defensible network.

## Transform Vulnerable Devices into Defensible Assets

IoT and IIoT devices now integrate directly into sensitive areas within professional networks, giving them potential access to high-value systems and data. Despite the increased adoption, IoT/IIoT visibility and security lags other areas, resulting in new attack vectors with relatively few protections.

GuidePoint Security delivers comprehensive IoT/IIoT security assessments designed to identify gaps and risks, and fix IoT and IIoT vulnerabilities. We help users regain visibility and control and protect critical operations without disruption.

Collaborate & Communicate	Identify Security Gaps	Prioritize & Mitigate Risks
Ensure IT, development, and support teams understand IoT/IIoT risks and environments.	Achieve continuous visibility to enable informed decision-making that complies with evolving regulations.	Deliver a strategic, outcome-driven security strategy for IoT and IIoT devices in your organization.

## Put a Highly-Trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

# Accelerate IoT and IIoT Integration With Confidence While Protecting What Matters Most

GuidePoint Security delivers comprehensive IoT and IIoT security solutions that transform vulnerable devices into strategic, managed assets, while ensuring operational integrity.

## Build Confidence in Your IoT and IIoT Networks

GuidePoint transforms IoT/IIoT uncertainty into confidence by establishing complete visibility across your device ecosystem. Our process begins with comprehensive visibility assessments and threat modeling to build a defensible architecture from the ground up. Through active testing and expert validation, we uncover hidden vulnerabilities and prioritize remediation based on business impact. This strategic approach enables you to reclaim enforceable control over your IoT environment, systematically reducing risk while maintaining a resilient network against evolving threats.

## Keep Operations Running Reliably and Resiliently

Once you have a strong IoT/IIoT network, GuidePoint helps you maintain operational resilience while enhancing security with purpose-built solutions for IoT/IIoT environments. Our asset discovery process gives you continuous visibility, precisely mapping where IoT devices intersect with critical infrastructure. You'll gain protection without disruption, while our threat modeling approach embeds security directly into development processes. The result: a balanced strategy where operational continuity and robust protection reinforce, rather than compete, as your IoT ecosystem evolves.

## Why GuidePoint Security

Before cyber threats hit, you'll want the best on your side. GuidePoint brings diverse expertise across hardware, software, networks, and human factors, which is crucial for complex IoT and IIoT environments. Our security assessments adapt to your unique device ecosystem rather than following generic checklists. Backed by consultants with real-world exploitation experience and deep knowledge of active threat actors, we deliver solutions that address actual risks, not theoretical ones.

## About Us

GuidePoint Security provides proven cybersecurity expertise, solutions, and services to help organizations make better business decisions. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet-level agencies to improve their security posture. Our partnership makes us your trusted advisor — not just another service provider.
