GUIDEPOINT SECURITY

Threat Intelligence plays a crucial role in a successful cybersecurity program now more than ever before.

Threat Intelligence has become more difficult to manage, and qualified talent is hard to acquire.

GuidePoint Security's unique approach to Threat Intelligence helps our customers achieve their intelligence goals. Whether you just want a plan for maturing your current threat intelligence operations, or you need a team to run a full threat intelligence program for you, GuidePoint Security will help you get to where you want to be.

Over time, the concept of "threat intelligence" has become more and more complicated. As vendors adapt to try to meet threat intelligence demands, the market has quickly become saturated with point solutions and grown increasingly obfuscated. Many cybersecurity teams may think they have a complete program, however, they're often missing key components and lack funding to expand.

Threat intelligence, just like cybersecurity, is not a monolith. It requires individuals with unique skill sets—often dedicated to niche areas of expertise—in threat intelligence. You need to cover all those facets, and it's hard to do that with a limited number of people who are already doing multiple jobs and trying to become experts on the fly.

GuidePoint Security's Research and Intelligence Team, GRIT, is built to meet your organization where it is, and address these difficulties with maturity assessments, stand-alone threat intelligence services, and full Threat Intelligence as a Service offerings. These services are customizable to fit your organization's needs so you can grow and expand at your pace.
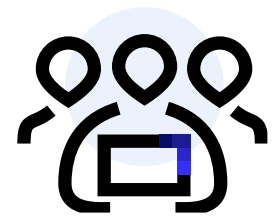

Let Our ELITE Team be Your ELITE Team

GuidePoint Security's dedicated Threat Intelligence team allows you to utilize expert threat intelligence resources as an extension of your cybersecurity team.

Build a Threat Intelligence program that fits your organization's needs, from maturity assessments and planning for your program, all the way to full, turnkey Threat Intelligence as a Service.

Threat Intelligence Advisory Services

Threat intelligence maturity comes as a result of successfully executing key threat intelligence plans and program initiatives. Knowing where you are is a critical component of deciding where you want to go next. GRIT's Threat Intelligence Advisory Services give you a quantitative maturity rating that allows you to make tactical and strategic threat intelligence program decisions that keep you moving in a positive direction. Our threat intelligence experts leverage years of experience, and threat intelligence best practices to understand your organization's threat intelligence goals and help you achieve them.

Exposure Management

The days of the perimeter being defined at an organization's firewalls have come and gone. As organizations have scaled to cloud infrastructure, SaaS applications, and the internet has made us more connected than ever, managing exposure from all perspectives is a critical component of an organization's security posture and cybersecurity strategy.
