

WIZ CNAPP ENABLEMENT SERVICES

Accelerate Your Time-to-Value

Many organizations struggle to fully operationalize their CNAPP platforms to take full advantage of their deep cloud insights, actions, and risk reduction potential.

GuidePoint Security's CNAPP enablement services help customers fully integrate, operationalize, and optimize their Wiz platform. From posture management to automated remediation, GuidePoint's comprehensive CNAPP services ensure Wiz is fully implemented, so you can reduce alert fatigue, improve ROI, and mature your cloud security for confident risk mitigation.

Better, Stronger, Faster Wiz Implementation

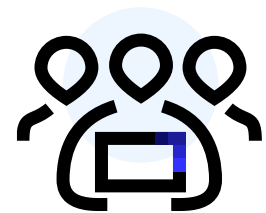

Wiz shows you cloud risk, GuidePoint helps you act on it.

GuidePoint Security's CNAPP enablement services turn Wiz into a fully operationalized solution through tailored onboarding, policy tuning, integration, and remediation planning. We start by aligning Wiz with your environment and priorities so it will deliver relevant, actionable insights. The result is faster implementation, reduced noise, improved risk response, and a mature cloud security program that evolves with your business.

Wiz delivers agentless, full-stack visibility into cloud environments—but turning that visibility into action requires expert implementation. GuidePoint's CNAPP enablement services help organizations operationalize Wiz and build scalable, risk-focused cloud security programs.

A GuidePoint health check assesses your cloud posture so we can tailor a prioritized roadmap. Our engineers help deploy and optimize Wiz across AWS, Azure, and GCP, integrating it into your CI/CD pipelines, alerting systems, and broader DevOps workflows. From tuning Wiz's graph engine to mapping outputs to compliance goals, every step is tailored to your specific risk landscape and business needs.

The GuidePoint portfolio also includes advanced enablement for posture management (CSPM), threat detection (CDR), data security (DSPM), and secure code development, plus managed service models that support long-term maturity.

Put a Highly-Trained, **ELITE** Team on Your Side

More than 70% of our workforce consists of tenured cybersecurity engineers, architects and consultants.

Hundreds of Industry and Product Certifications

GuidePoint Security's CNAPP enablement services help organizations transform Wiz into a fully operationalized, outcome-driven security solution. Wiz delivers broad visibility; GuidePoint ensures you can act on it effectively. Our services are modular and offered a la carte—so you can choose exactly what fits your needs, without unnecessary add-ons.

Whether you need deployment support, policy tuning, risk prioritization, or integration with your CI/CD pipelines, GuidePoint delivers targeted expertise to meet you where you are. We help align Wiz to your business goals, cloud architecture, compliance frameworks, and existing workflows—without requiring a full-scale engagement.

Rapid Onboarding

Accelerate your Wiz deployment with tailored support for quick operational readiness.

Secure Code Development

Integrate security into your CI/CD pipelines to detect vulnerabilities early and reduce risks.

Migrations & Integrations

Seamlessly migrate to Wiz and integrate with your existing tools for continuous security.

Cloud Detection & Response

Enable real-time threat detection and automated responses to safeguard your cloud.

CSPM

Build and customize security frameworks for proactive risk management and compliance.

Advanced Deployments

Tailored deployment strategies that adapt to unique tenant requirements, such as custom networking setups.

DSPM & AISPM

Identify and classify data, AI models, and potential vulnerabilities across cloud environments.

Scripting & Reporting

Automate processes and deliver tailored insights with custom scripts and reports.

Available services include:

Wiz Health Check

Assess your cloud security posture and identify key opportunities for alignment

Deployment & Integration

Support across AWS, Azure, GCP, hybrid environments, and CI/CD workflows

Policy Tuning & Risk Prioritization

Optimize Wiz's graph engine for your business context

Custom Alerting & Reporting

Build automation that supports your team's workflows and metrics

Enablement Modules

Choose one or many:

- CSPM (Cloud Security Posture Management)
- CDR (Cloud Detection and Response)
- DSPM (Data Security Posture Management)
- Secure Code Enablement

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
