

Maximize Business Impact by Securely Adopting AI

Widespread and fast-tracked adoption of AI often bypasses IT and security processes and approvals, leaving organizations exposed to data breaches, unauthorized system access, and compliance failure.

Bridge the gap between innovation and security, and turn AI into a force multiplier for your organization. GuidePoint Security helps organizations securely and confidently adopt, govern and scale AI. With our experts by your side, we tailor solutions that provide the governance, transparency, and insight you need to minimize risk and stay ahead of evolving threats. We enable you to capitalize on the business potential of AI without sacrificing security.

AI-driven Business Advantage

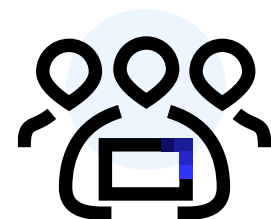

AI is transforming business processes, roles, and opportunities. Organizations are racing to take advantage of the potential AI offers – increased innovation and efficiency, cost control, and faster time to market. Without the right architecture and security processes in place, AI can expose your organization, data, users, and operations to risk including:

- ✓ Unregulated solution adoption (shadow IT) increases security and privacy risks
- ✓ Data can be vulnerable to breaches/misuse. There's also a risk proprietary data will be incorporated into the tools learning models and shared with competitors or the market at large
- ✓ Difficulty maintaining a clear understanding of which systems, data and users have access to what
- ✓ Complex regulations require more oversight to ensure compliance
- ✓ Models must be secured, protected, and monitored against bias and discrimination to prevent ethical issues, skewed or false data

GuidePoint Security helps you adopt and scale AI responsibly so you can align AI with compliance and business outcomes.

Our team of highly certified cybersecurity experts:

Put a Highly-Trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

Drive AI Innovation Without Sacrificing Security

GuidePoint Security empowers your organization to adopt and optimize AI solutions securely, so you can innovate without compromise. We work by your side to help you supercharge business operations with AI. We make it easy to integrate AI into your workflows to minimize risk and maximize impact — so you move faster, smarter, and safer.

Strategic Advisory

Design a scalable, security-first AI strategy. We evaluate readiness, recommend tools, and support architecture planning to help you enhance productivity, reduce risk, and enable innovation.

AI Governance

Establish oversight frameworks that enforce ethical, secure AI use. We define ownership models, usage policies, and governance aligned with evolving regulations, industry standards and compliance mandates.

Risk Mitigation

Identify AI-specific risks and reduce exposure. We streamline controls, optimize operations, and build policies to support secure, resilient growth.

Data Privacy and Protection

Secure sensitive data, users, and workflows. We apply scanning, classification, and access controls to protect identities and ensure compliance.

AI-Driven Threat Response

Respond with speed and clarity. Our experts build IR playbooks tailored to AI-driven threats, including internal compromise and shadow tool misuse – ensuring rapid, informed, and effective response.

Why GuidePoint Security

AI brings incredible potential to organizational success. It can reduce costs, fuel innovation, and increase productivity and efficiency. GuidePoint Security enables organizations to safely and confidently realize the full power and potential of AI. We help organizations of every size and industry design, deploy, deliver and govern AI solutions to safeguard data and assets, and accelerate business success. We integrate solutions across any environment – faster, smarter, and with less risk – to strengthen cybersecurity defenses. Accelerate your business with confidence – and protect what matters most.

About Us

GuidePoint Security provides proven cybersecurity expertise, solutions, and services to help organizations make better business decisions. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet-level agencies to improve their security posture. Our partnership makes us your trusted advisor – not just another service provider.
