

## Stay Ahead of AI-powered Threats

AI makes it easier and faster for adversaries to strike. As attackers launch increasingly sophisticated campaigns, even the best protected organizations struggle to stay ahead of threats.

Outpace Artificial Intelligence (AI)-powered attackers with defense strategies built for precision, scale, and speed. GuidePoint Security helps organizations find their security gaps and weak spots and tailors solutions that adapt to evolving risks. Our experts provide the clarity and confidence you need to protect your critical assets from AI-driven threats. Trust us to keep your organization ahead in an increasingly complex cybersecurity landscape.

### Evolve Threat Defenses

Artificial Intelligence (AI) enabled threats move fast. Your defenses must move faster. As AI use transforms the threat landscape, more attackers gain the alarming advantages of speed, scalability, precision, and evasion. From deepfake phishing to AI-generated malware to automated vulnerability exploitation, your traditional defenses can't keep up.

GuidePoint Security doesn't just understand the threat landscape; we anticipate it, empowering you to stay ahead of even the most complex threats.

Our elite team, armed with top cybersecurity certifications and hands-on experience, helps organizations design AI-ready security architectures. With unmatched expertise, we help you build defenses that evolve with threats and protect what matters most: your critical assets, data, and people. We help organizations:

- ✓ Understand and anticipate AI-driven threats
- ✓ Detect and disrupt cyber attacks faster
- ✓ Automate triage and response workflows to speed response
- ✓ Reduce alert fatigue and false positives
- ✓ Safeguard users, data, and infrastructure
- ✓ Prepare for adversarial AI scenarios with targeted playbooks
- ✓ Build adaptive, intelligence-led defenses

### Put a Highly-Trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

# AI is Changing the Threat Landscape; We Keep You Ahead of What's Next

GuidePoint Security experts evaluate, deploy, and optimize AI-based tools and solutions to strengthen your security posture. With our team by your side, we help you architect solutions that protect users, data, and IT assets against AI-driven attacks. GuidePoint Services include:

## Executive Advisory (vCISO)

Put a cybersecurity expert at the head of your battle against AI-driven threats. Our executive advisory team develop AI-aware security strategies, conduct end-to-end risk assessments, evaluate AI-driven and AI-defense tools, and guide integration efforts to reduce exposure and increase resilience against all cyber attacks—not just AI.

## AI-powered Threat Detection

Fight AI with AI. We help you leverage AI-driven tools to identify, detect, and respond to threats in real-time, including anomaly detection and predictive analytics.

## AI Governance

Ensure safe and ethical use of AI technologies to combat cyber threats. We help define governance frameworks, ownership models, and security guardrails aligned with regulatory standards.

## Risk Mitigation

Identify the assets, systems, devices and users that are most at risk for AI-driven attacks. We help you prioritize your efforts so that you can streamline controls and optimize operations. You'll be able to build policies and practices that reduce exposure to protect what matters most.

## Data Privacy and Protection

Safeguard data from AI threats. We help you develop a security-first data strategy that includes data encryption, secure storage, and data collection best practices to reduce the attack surface for AI-driven threats.

## AI-driven Threat Response

Identify and reduce threats from adversarial AI. We develop AI-specific IR playbooks, integrate GenAI into workflows to optimize detection controls, and support readiness planning to counter AI-related threat scenarios like LLM-based attacks, prompt injection, and data poisoning.

## Why GuidePoint Security

When AI-augmented cyber threats hit, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored cybersecurity solutions that drive real results. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence — and protect what matters most.

## About Us

GuidePoint Security provides proven cybersecurity expertise, solutions, and services to help organizations make better business decisions. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet-level agencies to improve their security posture. Our partnership makes us your trusted advisor — not just another service provider.
