

GUIDEPOINT SECURITY OVERVIEW

Stronger Together. Protecting What's Next.

Cybersecurity has never been harder to get right. AI-powered attacks, ransomware, and supply chain vulnerabilities grow more sophisticated by the day; while the talent to fight them grows scarcer. For organizations navigating AI, identity management, hybrid environments, risk quantification, and regulatory pressure, the right partner can turn complexity into confidence.

GuidePoint Security helps clients navigate complexity and simply secure modern IT environments. As a trusted advisor and partner, GuidePoint enables organizations to better protect, enable, and lead their cybersecurity efforts. We solve the most difficult cyber challenges, mature security architectures, and proactively reduce enterprise risk. Our purpose-built solutions ensure compliance, safeguard critical assets, and align security with business objectives. Backed by deep expertise, strong partnerships, and advanced technologies, we deliver scalable, adaptive capabilities that evolve with the threat landscape so our customers can lead with confidence and protect what's next.

Trusted Cybersecurity Advisor and Partner

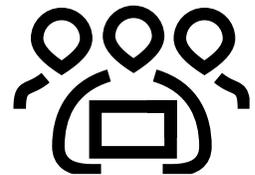

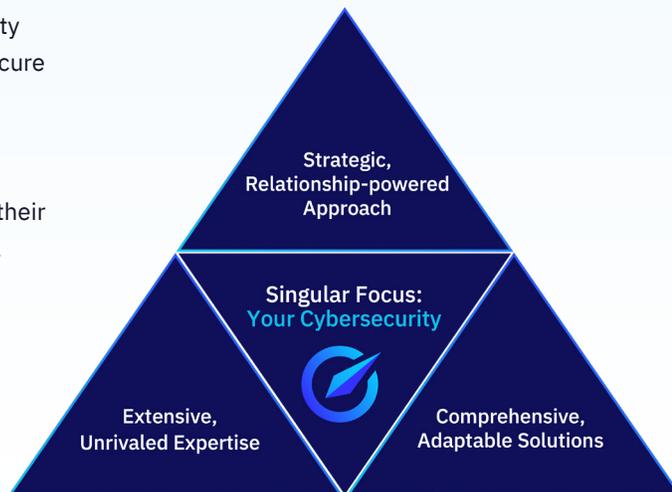

Founded in 2011 by cybersecurity industry veterans from the nation's top organizations, GuidePoint Security protects users, digital assets, and critical operations.

Our regional model provides customers with a tailored service experience and direct access to executive leadership. At the same time, that regional team has the backing of an elite, national-scale team to solve the most complex cyber challenges and mitigate risk. Our unrivaled cybersecurity expertise and relationship-based approach empower organizations with the insight, access, guidance, and support to make smarter, more strategic decisions, and strengthen their organization's security posture.

Our culture is rooted in doing what's right for our clients. That means we meet customers where they are in their cybersecurity journey. We work with each client to understand their unique challenges, goals and priorities. GuidePoint delivers tailored, vendor-objective strategies and technologies shaped by what they need, not what's easy, to achieve designed security and business outcomes.

As a trusted cybersecurity partner, we don't just secure against today's threats, we enable organizations to move forward with complete confidence in their cybersecurity tomorrow.

*Stronger Together.
Protecting What's Next.*

Your Cybersecurity is Our Mission

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War and U.S. intelligence agencies.

Cybersecurity Tailored to Your Organization

We help organizations of all sizes and across all industries protect assets, enable more informed decisions, and minimize risk. Our services span the cybersecurity lifecycle, including:

- Application Security (AppSec)
- Artificial Intelligence
- Cloud Security
- Data Security
- Email Security
- Endpoint Security
- Governance, Risk & Compliance (GRC)
- Identity & Access Management
- Incident Response & Threat Intelligence
- Network & Infrastructure Security
- Operational Technology (OT) Security
- Security Operations
- Vulnerability Management & Penetration Testing

Professional and Technical Solution Services

GuidePoint helps organizations assess their cybersecurity posture and architecture, identify gaps and vulnerabilities, and eliminate complexity. We also help ensure regulatory compliance and define best practices and policies across the cybersecurity landscape. GuidePoint heavily vets and develops deep technical expertise around our vendor offerings to help customers navigate the complex IT and cybersecurity landscape. This helps ensure the best-fit and lowest total cost of acquisition for cybersecurity services and solutions. Our services include:

- Vendor-objective technology subject matter experts covering 800+ vendor relationships (established and emerging)
- Evaluate, benchmark, and recommend the most suitable cybersecurity solutions based on client need and success criteria
- Technology evaluation, implementation, optimization, operationalization
- Security architecture review and technology effectiveness review
- Security tool rationalization
- Staff augmentation and virtual CISO services
- Security awareness and education training

As-a-Service | Managed Services Offerings

GuidePoint provides “As-a-Service” offerings to scale your team and resources on-demand including: AppSec, compliance, identity, network security and SASE, vulnerability management, penetration testing, breach and attack simulation, threat intelligence, OT platform as a service, among others.

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security grew our business on a trusted relationship framework. That means very personalized, local engagement backed by a national team. GuidePoint Security designs, deploys, and delivers tailored cybersecurity strategies and solutions that drive real results. We’ve put our technology vendors through a rigorous vetting process to ensure we know exactly how they solve real customer challenges. As your trusted advisor, we take a vendor-objective approach. This ensures our clients have the comprehensive, adaptable solutions their unique environment requires. We integrate solutions across any environment — faster, smarter, and with less risk — to strengthen your defenses and maximize the value of cybersecurity technology investments.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client’s most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation’s leading organizations today and provide complete confidence in their cybersecurity tomorrow.
