

AWS SECURITY SERVICES

Smarter AWS Security for Scalable Growth

Organizations face mounting pressure to innovate faster in AWS environments while managing sophisticated cyber threats. Meanwhile, security teams struggle with resource constraints, skill gaps, and tight budgets.

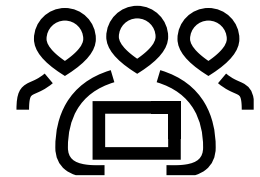

Organizations rely on Amazon Web Services (AWS) to store critical data, house and run applications from development through production, and connect across vast networks and third-party ecosystems. Securing these environments is critical to business continuity. GuidePoint Security delivers comprehensive AWS security services that bridge skill gaps, manage compliance, and optimize operations. As a trusted advisor and partner, GuidePoint helps organizations shift to proactive risk management, build and mature scalable security architectures, and drive cost-efficient controls that enable innovation and accelerate AI adoption while staying ahead of evolving threats.

A Proven Path Toward Stronger AWS Security

Securing foundational AWS environments requires the right expertise, at the right stage, with the right architectural intent to reduce risk and improve resilience.

GuidePoint Security delivers tailored security solutions for AWS environments. With proven security strategies grounded in real customer context, GuidePoint designs with scalability in mind and delivers solutions that secure the organization today while preparing for whatever comes next. The GuidePoint Cloud Security team helps organizations:

- ✔ **Discover** security gaps, vulnerabilities, and compliance issues
- ✔ **Design** scalable, secure-by-design solutions using AWS best practices and Well-Architected principles
- ✔ **Build** security into every layer of the AWS environment
- ✔ **Improve** security posture as AWS environments evolve

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and U.S. intelligence agencies.

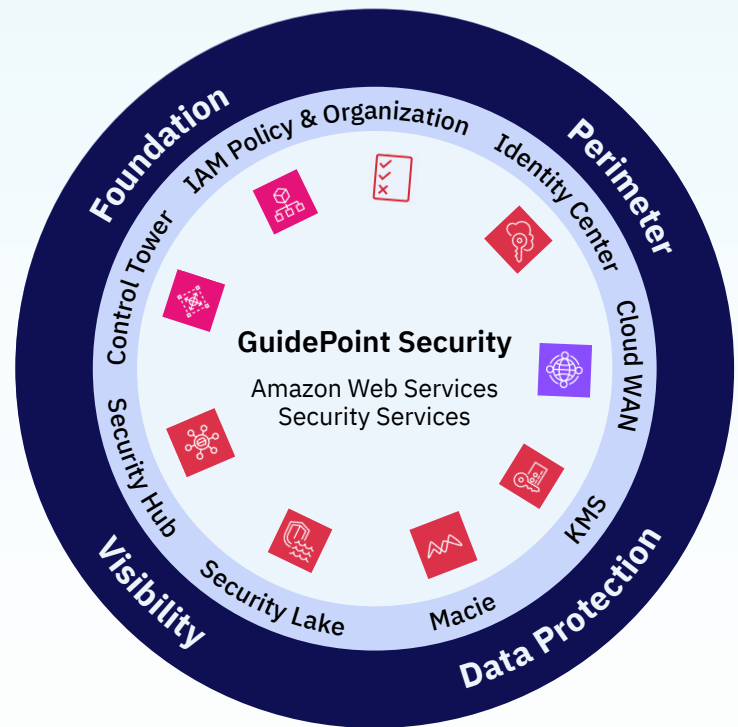

Optimize and Scale End-to-end AWS Security

GuidePoint Security helps organizations transform AWS into a robust, secure foundation. We meet customers where they are in their cloud security maturity, and we guide them toward accomplishing their business objectives. Through comprehensive assessments, expert architecture and design, seamless implementation, and unwavering support, we help organizations turn AWS security technologies into strategic advantages.

Build a Secure Foundation

From initial architecture through ongoing operations, we help organizations establish security controls that protect workloads, data, and users across the entire AWS ecosystem. GuidePoint's credentialed experts bring a deep understanding of AWS architectures, best practices, compliance frameworks, and security concepts to help:

- ✓ Establish strong identity and access controls with IAM policies, Control Tower, and organizational governance structures
- ✓ Protect the perimeter with cloud-native threat detection using GuardDuty, WAF, and Security Hub integration
- ✓ Safeguard sensitive data with Macie for data discovery and classification, combined with Key Management System (KMS) encryption strategies
- ✓ Gain complete visibility through Security Hub centralized monitoring and Security Lake for comprehensive security analytics

Secure the Organization's AI Journey

GuidePoint offers specialized security assessments for Amazon Bedrock, Amazon Q, and Amazon QuickSight to help organizations secure generative AI initiatives. These comprehensive evaluations assess AI model security, data protection, access controls, and compliance adherence. By identifying vulnerabilities unique to AI environments, organizations can innovate confidently while maintaining robust security. Our assessments align with the CSA AI Control Matrix and AWS Generative AI Well-Architected Lens to ensure implementations follow industry best practices and security standards.

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security delivers tailored services to empower AWS adopters. Whether at the start of the AWS security journey or looking to refine an advanced setup, we meet organizations where they are. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen defenses. Accelerate your business with confidence — and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
