

GOOGLE CLOUD SECURITY SERVICES

Google Cloud Security that Scales with the Organization

Organizations face mounting pressure to innovate faster in Google Cloud environments while managing sophisticated cyber threats. Meanwhile, security teams struggle with resource constraints, skill gaps, and tight budgets.

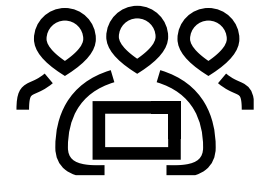

Securing Google Cloud environments is critical to business continuity for many organizations. Google Cloud stores critical data, houses and runs applications from development through production, and connects across vast networks and third-party ecosystems. GuidePoint Security Google Cloud Security Services help bridge skills gaps, manage compliance, and optimize operations. As a trusted advisor and partner, we help organizations shift to proactive risk management, mature and build scalable security architectures, and drive cost-efficient controls to enable innovation and AI adoption while staying ahead of evolving threats.

Expert-led Security for Google Cloud Innovation

Securing foundational Google Cloud environments requires the right expertise, at the right stage, with the right architectural intent to reduce risk and improve resilience.

GuidePoint Security delivers tailored security solutions for Google Cloud environments. With proven security strategies grounded in real customer context, we design with scalability in mind and deliver solutions that secure the organization today while preparing for whatever comes next. We help customers:

- ✓ **Discover** security gaps, vulnerabilities, and compliance issues
- ✓ **Design** secure landing zones following Google's Foundation Toolkit and Security Blueprints
- ✓ **Build** security into every layer of the Google Cloud environment
- ✓ **Improve** security posture environments evolve

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and U.S. intelligence agencies.

Optimize and Scale End-to-end Google Cloud Security

Google Cloud Security for What's Next

GuidePoint Security helps organizations transform Google Cloud into a robust, secure foundation. We meet customers wherever they are in their cloud security maturity and guide them toward their objectives. Through comprehensive assessments, expert architecture and design, seamless implementation, and unwavering support, we help organizations turn Google Cloud security technologies into strategic advantages.

Build a Secure Foundation

From initial architecture through ongoing operations, GuidePoint helps organizations establish security controls that protect workloads, data, and users across the entire Google Cloud ecosystem. Our credentialed experts bring a deep understanding of architectures, best practices, compliance frameworks, and security concepts to help:

- ✓ Build compliant landing zones with built-in governance controls that enforce security policies across Google Cloud environments
- ✓ Strengthen identity security posture with comprehensive Cloud Identity, Workspace, and Chrome Enterprise assessments and implementations
- ✓ Deploy zero-trust frameworks with advanced access policies and BeyondCorp controls, protecting collaboration platforms while maintaining productivity
- ✓ Leverage Security Command Center, Google SecOps, and Chronicle for real-time threat detection and automated response

Secure an Organization's AI Journey

GuidePoint experts also help safeguard AI initiatives with expert support that help organizations secure Vertex AI and Gemini implementations and align with governance frameworks and compliance requirements. Whether deploying generative AI applications or building custom models, GuidePoint customers gain confidence that AI implementations maintain security standards while accelerating business outcomes.

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security delivers tailored services to empower Google Cloud adopters. Whether at the start of the Google Cloud security journey or looking to refine an advanced setup, we meet organizations where they are. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen defenses. Accelerate your business with confidence — and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
