

**SUPPLY CHAIN DETECTION AND RESPONSE SERVICES**

# Operationalize Third-party Risk Management for Scalable Supply Chain Security

Legacy risk management often can't keep pace with the explosive growth of third-party application dependencies. As a result, software supply chains are one of the most critical – and exploited – attack vectors.

GuidePoint Security's Supply Chain Detection and Response (SCDR) services help organizations gain continuous visibility, reduce risk, and maintain compliance across complex supplier ecosystems. By embedding third-party risk monitoring into Security Operations Center (SOC) workflows, GuidePoint helps operationalize risk intelligence. With actionable guidance and support, customers can confidently secure their supply chains, strengthen security posture, and achieve measurable, compliance-aligned outcomes.

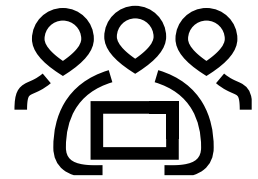

## Real-time Supply Chain Awareness

Effective supply chain security requires continuous visibility into supplier risk, alignment with security and compliance requirements, and the ability to engage vendors in meaningful remediation efforts. Traditional Third-party Risk Management (TPRM) programs are strengthened by continuous oversight and deeper operational insight across the supply chain to better address today's evolving third-party threats.

GuidePoint Security's Supply Chain Detection and Response (SCDR) services complement existing TPRM programs with real-time monitoring, GRC- and SOC-aligned policy enforcement, and expert-led incident response support. This integrated approach helps organizations identify supplier risk earlier, improve vendor accountability, and reduce overall third-party exposure.

With GuidePoint, organizations that rely on complex supply chains can:

- ✓ Gain visibility into risks across supplier ecosystems
- ✓ Expedite risk remediation and incident response
- ✓ Enforce regulatory-aligned supply chain policies
- ✓ Withstand and recover from security incidents faster

## Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly-trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and U.S. intelligence agencies.

# Build Cyber Resilience into the Software Supply Chain

GuidePoint Security has heavily vetted over 800 cybersecurity solutions to help organizations of all sizes and across all industries protect assets, enable more informed decisions, and minimize risk. GuidePoint SCDR services include:

## Continuous Third-party Risk Monitoring

Gain ongoing visibility into vendor security posture across the supplier ecosystem. GuidePoint SCDR delivers continuous monitoring, risk analytics, and exposure tracking to identify emerging supplier risks, prioritize high-impact vendors, and support informed mitigation and escalation decisions.

## Integrated Supply Chain Incident Response

Extend incident response capabilities to include supplier-originated threats. GuidePoint integrates supply chain risk intelligence into existing SOC operations, SIEM, SOAR, and incident response workflows to accelerate detection, improve triage, and enable coordinated response across internal and third-party incidents.

## Supplier Remediation and Risk Accountability

Drive structured supplier remediation and improve accountability across third-party relationships. GuidePoint facilitates supplier engagement, tracks remediation progress, validates corrective actions, and delivers standardized documentation and reporting to support defensible oversight and measurable risk reduction.

## Ongoing Program Development

Modernize traditional TPRM with a scalable, operationalized SCDR approach. GuidePoint helps organizations align supply chain risk management with GRC and security operations to improve visibility, strengthen resilience, and support evolving supplier ecosystems through continuous oversight and response.

## Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security brings deep third-party risk expertise, vendor-neutral guidance, and managed execution to help organizations continuously monitor supplier ecosystems and activate SOC-aligned response. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence — and protect what matters most.

## About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
