

CRIBL SERVICES

Unlock the **Potential** of Your Telemetry with Cribl and GuidePoint Security

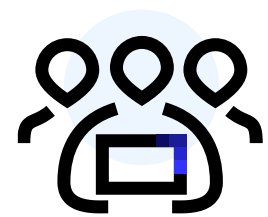

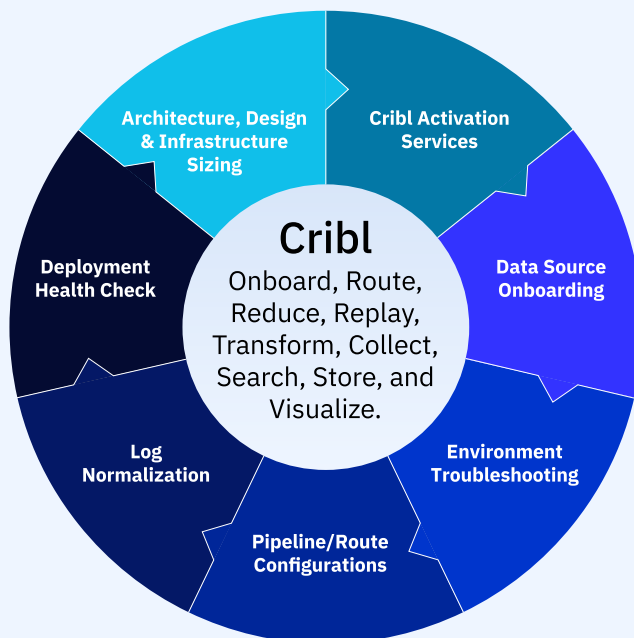

Attack surfaces are expanding, threats are increasingly more complex, and evolving regulatory pressure all require organizations to more effectively use their security data to improve security outcomes.

Unlock the full potential of your data with GuidePoint Security services for Cribl. Our Cribl-certified experts architect and optimize effective deployments to eliminate inefficiencies and maximize the value of your data. GuidePoint focuses on customization and actionable insights to ensure your organization stays resilient against emerging threats.

Get the Most Out of Your Cribl Investment

Organizations turn to Cribl to normalize telemetry data, including logs, metrics, traces, and events to streamline event and incident response. Despite the easy-to-use interface, it can be difficult to properly configure and optimize its more advanced features. Any misconfiguration or inefficient routing creates dangerous gaps in visibility, slow performance, and/or bury critical insights under noisy, unstructured logs.

GuidePoint helps organizations optimize their Cribl investments, make more informed cybersecurity decisions and minimize risk. Our white-glove approach enables us to build, optimize and tailor solutions to each organization's unique challenges to ensure they achieve desired security outcomes. We help you maximize the value of your data, strengthen your security posture, and prepare for a resilient future that guards against evolving threats.

Put a Highly-trained, **ELITE** Team on Your Side

Your organization will be backed by our team of cybersecurity engineers, architects and consultants who are veteran practitioners from Fortune 100 companies, the Department of Defense and U.S. intelligence agencies.

Turn Your Telemetry into a Tactical Advantage

Streamline and Strengthen Your Data Pipelines

Messy data pipelines create cost overruns, performance issues, and limit visibility. GuidePoint Security helps you activate and optimize Cribl so your observability environment runs efficiently, scales securely, and delivers meaningful insights.

- ✓ Onboard and normalize your telemetry sources
- ✓ Ensure complete and accurate data observability
- ✓ Right-size your deployment while planning for future scalability

Comprehensive Cribl Services

Our Cribl activation services for Silver, Gold, or Platinum provide flexible options to match your organization's needs. Our white glove services go beyond setup with offerings that include additional data source onboarding, log normalization, route and pipeline configuration, and environment troubleshooting. For specialized use cases, we deliver on-premises deployment health checks, infrastructure sizing, and cross-domain solution (CDS) and Federal Information Processing Standards (FIPS) engineering tailored for federal environments. From architecture to optimization, we ensure your Cribl deployment reduces noise, trims costs, and maximizes data value.

Expert Engineering Support

GuidePoint's engineering brings deep Cribl expertise directly into your team. Our engineers provide hands-on guidance for architecture, deployment, and ongoing tuning, ensuring your environment remains resilient and high performing. With our experts embedded as an extension of your staff, you gain both the technical depth and practical experience needed to keep pace with evolving data and security demands.

Why GuidePoint Security

When accurate data matters, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored cybersecurity solutions that drive real results. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence—and protect what matters most.

About Us

GuidePoint Security provides proven cybersecurity expertise, solutions, and services to help organizations make better business decisions. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet-level agencies to improve their security posture. Our partnership makes us your trusted advisor — not just another service provider.
