

We Have The Expertise **Required** To Implement Or Customize Your Solution

We realize that managing privileged accounts is often an overwhelming task.

We understand the abuse of these accounts can be among the things keeping company leadership awake at night. Especially since, according to Forrester Research, 80% of the data breaches started with privileged account abuse.

Gartner has listed the implementation of a Privileged Access Management (PAM) solution as one of the “Top Security Projects” for several years running. However, it’s still a matter of having the people and expertise needed to build an effective solution to protect these accounts for many organizations.

We can assist in discovering your organization’s privileged access and service accounts, then put protections and management parameters in place and enable the following PAM capabilities:

- ✓ Provide installation services to implement your PAM solution into your environment
- ✓ Integrate your PAM solution with current technologies such as load balancers, multi-factor authentication platforms, and SIEMs
- ✓ Identify what privileged accounts are on your network
- ✓ Identify the service accounts on your network
- ✓ Enable password management for privileged and service accounts
- ✓ Enforce non-repudiation with the use of privileged account sessions
- ✓ Manage passwords across varying operating systems
- ✓ Provide a threat analytics solution for the use of these accounts
- ✓ Provide a secure vault for storing passwords and password settings
- ✓ Implement an intuitive solution for account owners to provide approval for usage of privileged accounts

Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

We have achieved The Advanced Partner Tier, the highest level available to partners in the CyberArk Partner Network.

Numerous GuidePoint engineers carry CyberArk certifications, including several Certified Delivery Engineers and Level 4 Guardian certification. We can help:

- Customize a solution for your environment
- Advanced installation and implementation
- Educate your staff on the intricacies of using CyberArk
- Advanced troubleshooting
- Navigate other CyberArk solutions such as Privilege Cloud, Identity, Cloud Entitlements Manager, Vendor Privileged Access Manager, Conjur Secrets Manager, Endpoint Privilege Manager

GuidePoint Security's CyberArk Services include:

Customize to Meet Your Needs

Our engineers will work with you to address each of the challenges and produce a solution to meet your needs. The management and monitoring will help your organization ensure those who need to use these accounts can, and those who don't will be denied access. We have designed and implemented installations of CyberArk for customers of all sizes, seeking oversight into their account usage.

We can help you:

- Design a strategy and implement a custom offering appropriate for your environment.
- Go in-depth and look at parameters such as the number of users, operating systems, and integration with other parts of your security architecture.
- Give you greater visibility into the activities involving your privileged accounts.

Account Management Solutions

CyberArk has been named a Leader in the Gartner Magic Quadrant multiple times in a row, positioned highest in ability to execute and furthest in completeness of vision. Privileged access capabilities include:

- Account discovery
- Password rotations
- Password management through policies
- Secured vault for password and policy storage
- Recorded sessions
- Linux compatibility
- Account usage approval system
- Integration in many current environments

About CyberArk

CyberArk is the global leader in privileged access security, a critical layer of IT security to protect data, infrastructure and assets across the enterprise, in the cloud and throughout the DevOps pipeline. CyberArk delivers the industry's most complete solution to reduce risk created by privileged credentials and secrets. The company is trusted by the world's leading organizations, including more than 50 percent of the Fortune 500, to protect against external attackers and malicious insiders.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
