

FORESCOUT SERVICES

Gain the most value from your ForeScout platform with tailored services to meet your **specific business needs.**

Maximize the value from your ForeScout platform.

GuidePoint Security's highly-certified ForeScout engineers come from practitioner backgrounds and have a wide breadth and depth of real world experience.

GuidePoint Security has performed countless ForeScout platform installations and health checks, and has also designed advanced use cases for customers of all shapes and sizes.

Our Unique Approach

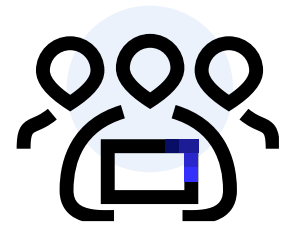

The first step of every ForeScout installation involves a collaborative workshop with key business stakeholders. It is the foundation for a successful project and helps reduce the risk of wasted cycles and unknowns.

Once we have agreed on the specifics, we will build out a phased project plan that is tailored to your environment and approach to risk, based on visibility and control. With an understanding of what is in your environment, we are better informed to understand the potential impact of implementing enforcement capabilities. By taking this risk-based approach we are able to increase the overall success of a ForeScout platform installation project.

Additionally, for customers who have ForeScout implemented, but are not maximizing the value of the platform, we take a multi-dimensional approach that examines people, process and technology and how it should be working together.

ForeScout Services Available

- ✓ Visibility Services
- ✓ Enforcement Services
- ✓ Health Check Services
- ✓ Advanced Use Cases

Put a Highly-Trained,
ELITE Team on
Your Side

More than 70% of our workforce consists of tenured cybersecurity engineers, architects and consultants.

Highly Certified ForeScout
Experts

GuidePoint Security provides a wide range of offerings to help ensure you maximize the value of your ForeScout platform.

Visibility Services

- ✓ Perform initial software installation, complete all software updates, and obtain licenses
- ✓ Configuration essential modules
- ✓ Integrations with network devices and systems
- ✓ Best practice policy configuration and customization
- ✓ Discovery and classification of devices
- ✓ Identification of unauthorized and non-compliant devices on the network
- ✓ Inventory population analysis
- ✓ Audit of applications installed, running services, running processes, registry keys, etc. across devices
- ✓ Configure reporting, dashboards, and logging

Enforcement Services

- ✓ Review, discuss, and capture organization-wide network security and host compliance requirements
- ✓ Determine the best blend of enforcement capabilities based on available architecture and risk tolerance
- ✓ Build phased approach, enforcement strategy and timeline
- ✓ Provide oversight for enforcement turn-up for all sites
- ✓ Build periodic operational procedures to keep things running smoothly
- ✓ Build and runbooks and job aids

Health Check Services

Our services go much further than just running updates or tweaking policies — we take a multi-dimensional approach to help you maximize your investment in ForeScout. Typical focus areas include:

- ✓ Business Use Case Alignment
- ✓ Architecture & Topology Review
- ✓ Performance, Versioning, Stability, & System Health
- ✓ Deep Policy/Configuration Review
- ✓ People and Process Review
- ✓ Reporting & Dashboards
- ✓ Platform Security
- ✓ Resolution of easy wins

At the conclusion, you receive a robust report outlining the current state of your ForeScout environment, its alignment with the original business use cases, and a list of detailed technical recommendations for maximizing your investment.

Advanced Use Cases

Our engineers have extensive experience integrating ForeScout into other third party platforms, and can help accelerate your project by incorporating our lessons learned.

- ✓ Enrichment of other platforms using ForeScout's data
- ✓ Threat hunting and incident response use cases
- ✓ Third party integrations
- ✓ Automated remediation for out-of-compliance hosts
- ✓ Custom API work

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
