

STAFF AUGMENTATION SERVICES

On-demand Cybersecurity Expertise and Support

Security teams are stretched thin, understaffed, underfunded, or overwhelmed, making it hard to keep up with daily operations, emerging threats, and evolving toolsets.

Whether it's daily security operations or critical surge coverage, GuidePoint Security can help you stay secure, agile, and fully staffed. Our on-demand cybersecurity analyst services deliver the support, expertise and leadership you need, when you need it. GuidePoint Security Analyst services are composed of highly certified experts who plug directly into your team, fast. Our flexible service model ensures you receive the specialized support services you need, without long-term commitments or unnecessary overhead.

Skilled Staff. Minimal Overhead.

Hiring, training, and retaining skilled security talent takes time and budget you may not have. GuidePoint Security fills the gap with experienced cybersecurity analysts and engineers who integrate quickly, work efficiently, and deliver measurable value. Our flexible model gives you just the support you need, as you need it, without the burden of onboarding, or long-term contracts.

- ✓ **Strategic alignment:** Our services complement (vs. compete) with your team, providing fully customizable and tailored engagements
- ✓ **Mission-first delivery:** Analysts focus on driving your security outcomes over filling seats
- ✓ **Rapid deployment:** Experts are available quickly so you have resources you need to minimize delays or disruption
- ✓ **Built for agility:** Flexible engagements allow you to adjust scope, skills and timelines as your environment evolves
- ✓ **Seamless integration:** We adapt to your tools, processes, and priorities
- ✓ **Surge-ready coverage:** Get extra hands during incidents, audits, or tool rollouts
- ✓ **No hiring delays:** Skip recruiting cycles with on-demand security professionals
- ✓ **Flexible, cost-effective support:** Services scale up or down based on your needs without a long-term commitment
- ✓ **Specialized security-focused expertise:** Unlike general MSPs, our team specializes in security operations. We cover the fully cybersecurity landscape, including SIEM tuning, IR, policy work, and more

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly-trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and the U.S. Intelligence Community.

Stay Ahead of Threats with Fast Access to Cybersecurity Expertise

GuidePoint Security's Analyst services are tailored to your business to drive measurable value and help enable risk-informed decisions, compliance, and resilience with the security support you need, exactly when and how you need it. These on-demand analyst services solve real staffing challenges without adding overhead or complexity. Highly skilled experts can help you stay ahead of threats. Expertise immediately available includes:

Analyst Services

- ✓ **SOC Analyst:** your frontline defense against cyber threats who monitor, detect and respond to security incidents. These experts will investigate alerts, contain breaches, and protect the organization's digital assets. Services can include mentoring your teams as well as monitoring, triage, investigation, escalation, and advanced SOC services.

Specialty Expertise

- ✓ **SIEM Engineer:** will help design, implement, and manage your SIEM platforms and manage data onboarding, normalization, and creating correlation rules to turn log data into actionable security alerts.
- ✓ **SOAR Engineer:** to help better understand and automate your on-prem or cloud-native environment, this person can help design, implement and manage automated security workflows to enhance SOC efficiency.
- ✓ **Observability Engineer:** designs and maintains systems to monitor, analyze and visualize data from application logs, metrics and distributed traces.
- ✓ **Threat Intelligence:** will help operationalize threat intelligence by analysing adversary behavior, campaigns, and indicators, and mapping them to your environment to enhance detection coverage, prioritization, and response decision making.
- ✓ **Threat Detection Engineer:** can help you develop, optimize and refine detection logic and systems to identify malicious behavior, suspicious activity, and potential cyber threats within your enterprise.

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored cybersecurity solutions that drive real results. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence — and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
