

EUROPEAN UNION (EU) CYBER RESILIENCE ACT (CRA) SECURITY SERVICES

Ensuring Product Security for a New Era of Cyber Resilience

Organizations face increased regulatory, operational, and business risk with digitization and AI. Many have not updated their cybersecurity processes and strategies. They also need to meet EU Cyber Resilience Act requirements, which requires mature vulnerability management, incident response, and reporting capabilities.

Any organization doing business with the European Union (EU) needs to understand and comply with The EU Cyber Resilience Act (CRA). It establishes mandatory cybersecurity and vulnerability-handling requirements for hardware and software products sold across the European market. GuidePoint Security helps organizations more effectively identify, prioritize, remediate, and report vulnerabilities while building the broader product security capabilities. We connect regulatory obligations to practical security processes, technology, and expertise, helping organizations ensure CRA readiness, strengthen product security, and reduce operational risk across the product lifecycle.

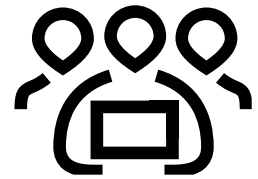

From Compliance Requirement to Strategic Capability

The European Union (EU) Cyber Resilience Act (CRA) is changing how organizations approach security for products with digital elements. Meeting these requirements requires more than policies and documentation. It requires the processes, technology, and expertise to continuously manage vulnerabilities, respond to security incidents, support secure product development, and meet strict reporting obligations.

GuidePoint Security helps organizations translate CRA requirements into practical product security capabilities. Our team brings deep expertise across all cybersecurity disciplines to build defenses and strengthen resilience throughout the product lifecycle.

Our capabilities span:

- ✓ Compliance Assessment and Advisory
- ✓ Cyber Risk Assessment
- ✓ Security Program Development and Executive Advisory
- ✓ Vulnerability Management and Continuous Security Validation
- ✓ OT and IoT Product Security
- ✓ Application Product Security
- ✓ Secure Development
- ✓ Supply Chain Integrity
- ✓ Incident Response Readiness

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and the U.S. Intelligence Community.

Build a Scalable Foundation for CRA Readiness

GuidePoint Security helps organizations prepare for and operationalize EU CRA requirements by strengthening product security capabilities, processes, and governance across the product lifecycle. Our services help organizations:

Assess and Align

Evaluate product portfolios against CRA cybersecurity requirements, assess gaps and risk considerations, and develop a prioritized roadmap aligned to vulnerability reporting obligations, conformity milestones, and implementation timelines.

Validate and Strengthen

Test and validate product security controls, strengthen vulnerability detection and response capabilities, and identify and remediate gaps as CRA standards, guidance, and implementation requirements evolve.

Build and Implement

Develop and operationalize CRA-aligned vulnerability handling, incident reporting, security update, and product security processes. Integrate required capabilities with existing security, engineering, and operational environments.

Sustain and Support

Provide ongoing advisory and operational support to maintain CRA readiness, strengthen governance, transfer knowledge, and build sustainable product security capabilities across engineering, security, compliance, and product teams.

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored cybersecurity solutions that drive real results. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. We help organizations assess their current security posture, identify gaps against CRA requirements, and implement practical, risk-based solutions to support compliance across the product lifecycle, from secure-by-design practices and vulnerability management to software supply chain security, incident response, and ongoing security monitoring. As a trusted cybersecurity advisor, GuidePoint helps turn regulatory requirements into actionable security strategies that strengthen resilience, reduce risk, and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
