

IDENTITY VERIFICATION SERVICES

Verify Trust Before Granting Access

Identity fraud is becoming more sophisticated and costly. Deepfakes, synthetic identities, and AI-powered social engineering are outpacing traditional verification methods, exposing organizations to significant financial and operational risk.

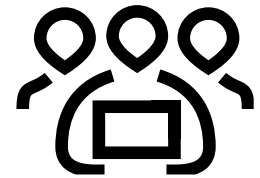

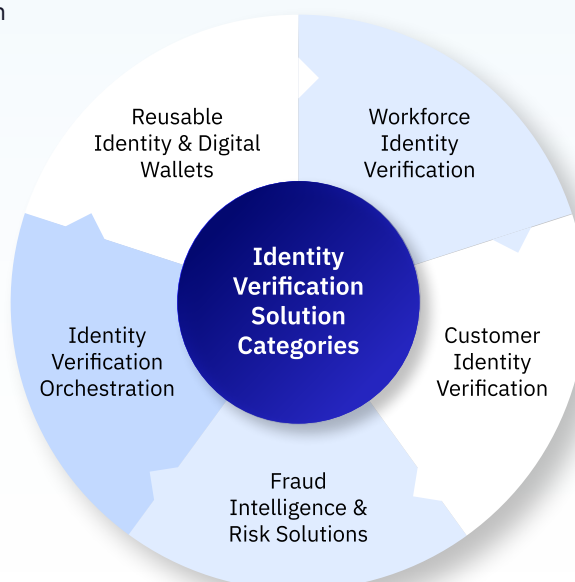

Improve your defenses against identity-based attacks with GuidePoint Security's Identity Verification (IDV) services. Our experts help organizations assess, modernize, and optimize identity verification processes across the entire identity lifecycle. From strategy and program maturity to technology evaluation and implementation guidance, we help clients strengthen identity assurance, reduce fraud, safeguard data and assets, and establish trust at every critical identity event.

Stay Ahead of Evolving Identity Threats

Identity is the foundation of modern security and digital trust. Every employee, contractor, partner, and other individual who interacts with an organization requires secure, appropriate, and well-governed access to digital resources. As organizations expand digital services, adopt cloud technologies, managing human identities and access across increasingly complex environments has become a critical security priority.

Effective identity and access management (IAM) helps organizations establish trust, reduce security risk, protect sensitive resources, and ensure that individuals have the appropriate access based on their role, responsibilities, and business needs. GuidePoint Security helps organizations strengthen identity assurance and stay ahead of evolving threats through solution categories that include:

- ✓ Workforce Identity Verification
- ✓ Customer Identity Verification
- ✓ Fraud Intelligence and Risk Solutions
- ✓ Identity Verification Orchestration
- ✓ Reusable Identity and Digital Wallets

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and the U.S. Intelligence Community.

Strengthen Identity Verification Across the Entire Identity Lifecycle

GuidePoint Security IDV services help organizations understand current capabilities, identify opportunities for improvement, and build a roadmap for strengthening identity assurance across the identity lifecycle.

Identity Verification Strategy and Roadmap

A full assessment of an organization's current identity verification posture paired with development of a prioritized, phased roadmap aligned to business objectives, risk tolerance, and operational maturity

Identity Verification Maturity and Gap Assessment

Benchmarking identity verification program against industry frameworks and best practices to identify gaps, quantify risk exposure, and establish a clear path toward operational maturity

Identity Proofing and Assurance Review

Deep dive into identity proofing workflows, assurance levels, and verification controls to determine whether an organization meets its stated trust requirements across customer and workforce populations

Technology Evaluation and Vendor Selection

Structured comparison of identity verification technologies and vendor capabilities against an organization's functional requirements, integration constraints, and long-term strategic direction

Program Modernization and Optimization

Focused analysis of the existing identity verification program to surface inefficiencies, outdated processes, and modernization opportunities that reduce cost while improving verification accuracy and user experience

Identity Verification Governance and Staff Requirements

Comprehensive look at governance structures, policy frameworks, and staffing models required to sustain and scale your identity verification program in alignment with operational and security objectives

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security combines cybersecurity expertise, identity strategy, and technology guidance to help organizations build resilient identity verification programs. Our vendor-objective approach enables clients to evaluate solutions, strengthen verification processes, and develop scalable strategies that reduce fraud risk and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
