

NON-HUMAN IDENTITY (NHI) SERVICES

Governing the Identities Behind Automation and AI

AI, automation, and cloud technology adoption is driving exponential growth in non-human identities (NHIs). Yet many organizations lack sufficient governance, accountability, visibility, and controls needed to securely manage these identities.

Improve non-human identity (NHI) security with GuidePoint. Our identity and access management (IAM) experts deliver a scalable strategy and prioritized approach to strengthening NHI governance, ownership and accountability, lifecycle management, privilege, and credential security. GuidePoint Security NHI Services help organizations assess their current maturity, close security gaps, strengthen controls, and implement practical strategies to reduce NHI risk. By helping organizations better secure and manage the machine identity lifecycle, we enable better automation, AI adoption, and secure business growth.

Securing the Invisible Workforce

Service accounts, APIs, cloud workloads, CI/CD pipelines, and AI agents are creating an expanding identity landscape that traditional programs may not fully address. These NHIs operate at scale, change rapidly, and can carry significant access across applications, infrastructure, and data, creating new challenges for visibility, governance, and risk management.

GuidePoint Security helps organizations gain visibility and control across the NHI landscape by identifying what exists, who owns it, what it can access, and where risk is concentrated. We assess existing capabilities, identify and close gaps, and develop a practical roadmap that builds on the organization's current security and identity investments to mitigate risk.

Our approach helps organizations:

- ✓ Reduce identity exposure
- ✓ Strengthen accountability and control
- ✓ Securely scale AI, automation, and modern applications
- ✓ Improve visibility across the NHI lifecycle
- ✓ Build on existing investments

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and the U.S. Intelligence Community.

Reduce Blind Spots Across the NHI Landscape

GuidePoint NHI Services help organizations discover, assess, govern, and secure machine identities across modern environments, from strategy through ongoing operations. Services include:

Advisory Services

- Develop an NHI strategy aligned to business objectives and existing investments, including governance, ownership, lifecycle, secrets management, and technology integration

Assessment Services

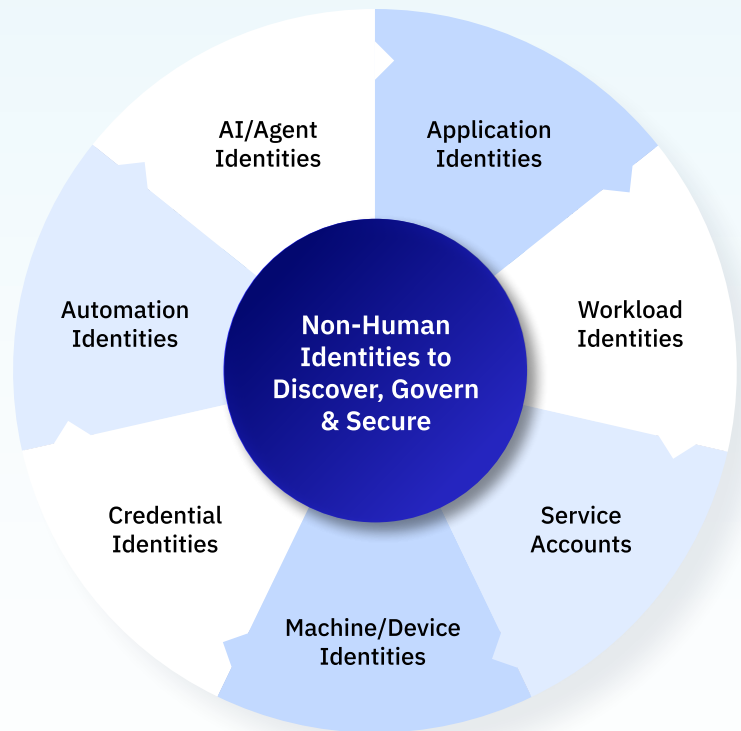

- Identify and evaluate NHIs, including service accounts, API keys, tokens, certificates, CI/CD identities, and cloud IAM roles, to uncover gaps and prioritize risk

Operational Services

- Implement NHI capabilities across identity, cloud, DevOps, endpoint, and SaaS environments to improve control and reduce unmanaged access

Managed Services

- Continuously monitor NHI risk and support remediation of orphaned identities, credential rotation gaps, policy drift, and excessive privilege

Why GuidePoint Security

When cyber threats evolve, organizations need confidence that every identity, human and non-human, is secure. GuidePoint Security combines cybersecurity expertise, identity strategy, and technology guidance to help organizations build resilient NHI programs. Our vendor-objective approach enables clients to assess NHI risks, strengthen governance and lifecycle controls, and implement scalable strategies that reduce identity risk and secure the automation, applications, and AI capabilities that power the business.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
