GUIDEPOINT® SECURITY

DIGITAL FORENSICS AND INCIDENT RESPONSE SERVICES

Build Cyber Readiness Through Confident Incident Response

As critical vulnerabilities accelerate in volume and velocity, organizations without a vetted, operational incident response program risk delayed responses, exploitation, and significant threats to data, operations, and reputation.

Transform cyber readiness from a strategic goal into an operational reality. GuidePoint's Digital Forensics and Incident Response (DFIR) services help organizations reduce the business impact of cyber incidents by improving preparedness, accelerating response and recovery, and strengthening resilience. The result is greater operational readiness, reduced disruption, and confidence that incident response capabilities will perform when they are needed most.

Be Ready Before, During, and After a Cyberattack

As AI accelerates the speed and scale of cyberattacks, organizations must be ready to respond. GuidePoint's DFIR experts help organizations prepare for threats, respond with confidence, and recover quickly with response retainers, along with proactive, reactive, and advisory services to continually improve incident response (IR) readiness.

GuidePoint Security's DFIR services help organizations transform uncertainty into operational readiness. Combining forensic expertise, IR assessments, program development, training, advisory services, and SLA-based retainers, GuidePoint delivers a comprehensive approach to incident response.

We tailor DFIR services to each organization's environment, priorities, and maturity so they can:

- **Accelerate threat detection, containment, and recovery** with 24x7 Incident Response and Threat Intelligence
- **Recover quickly from complex attacks** (e.g., ransomware, APT, BEC, and insider threats) through proven digital forensics and investigation strategies
- **Address long-term strategy** with proactive planning and post-breach follow-up
- **Combat the growing sophistication of AI-driven attacks** with elite practitioners who understand evolving threats
- **Respond with confidence across all environments,** including cloud, on-premises, SaaS, and operational technology (OT/ICS)
- **Navigate claims and legal processes** with pre-approved status from major cyber insurance carriers and extensive experience working alongside external legal counsel

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and U.S. intelligence agencies.

Comprehensive Incident Response to Combat Modern Threats

GuidePoint Security delivers incident response services that help organizations contain and recover from incidents when they happen and prepare for whatever comes next. Our services include:

IR Retainer Services

Eliminate response delays by securing guaranteed, SLA-backed access to elite incident responders before an incident occurs. GuidePoint Security's IR Retainers provide pre-approved terms, dedicated 24×7 hotline access, and on-demand forensic expertise across on-premises, cloud, and hybrid environments. Organizations receive pre-negotiated engagement frameworks, locked hourly rates, environment-specific onboarding, and the flexibility to convert unused hours into other security services.

Reactive Services

When an alert sounds, speed and expertise are the deciding factors between resilience and a costly breach. GuidePoint's reactive digital forensics and incident response services deliver rapid, comprehensive response and investigation capabilities to contain threats, minimize damage, and restore operations as quickly as possible. Services include:

- Incident Response
- Full-Lifecycle Ransomware Response Services
- Digital Forensics Services
- Recovery and Restoration Services
- Threat Actor Communications and Negotiations

Proactive Services

A strong incident response program starts long before an attacker targets the organization. GuidePoint's proactive incident response services help organizations build a resilient IR foundation, establish defenses, and gain the threat intelligence needed to stay ahead of emerging risks. Services include:

- Point-in-Time Compromise Assessments
- Subscription-Based Threat Hunting
- Threat Intelligence as a Service
- Threat Intelligence Maturity Programs

Advisory Services

Preparedness is only as strong as the understanding behind it. GuidePoint's advisory services equip internal teams with the knowledge and hands-on experience needed to act decisively and with confidence. Services include:

- Tabletop Exercises
- Purple Team Simulations
- IR Playbook and Runbook Development
- IR Plan Review
- Blue Team Knowledge Transfer and Enablement
- Threat Hunting Program Development
- IR Maturity Assessment
- Ransomware Readiness Assessment

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security designs, deploys, and delivers tailored proactive, reactive, and advisory services for digital forensics and incident response that drive real results. We integrate solutions across any environment — faster, smarter, and with less risk to strengthen your defenses. Accelerate your business with confidence – and protect what matters most.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
