GUIDEPOINT® SECURITY

COMPLIANCE PROGRAM IMPLEMENTATION SUPPORT

Turn Your Compliance Requirements Into a Working Program

Most organizations can identify their compliance gaps. Closing them is the problem. Policies stay static, control owners lack clarity, evidence remains uncollected, and certification timelines keep slipping.

Turn standard compliance requirements into a working program that closes gaps. GuidePoint Security Compliance Program Implementation Support works inside your compliance program to turn gap findings into functioning controls. Our experts help you write and revise policies, assign accountability to control owners, run the recurring activities that generate audit evidence, and prepare you for certification. The result is an Information Security Management System (ISMS) that stands up to external audits, clearly proving the effectiveness of your cybersecurity program.

Build a Compliance Program Your Team Can Run

Gap assessments tell you what is missing. They do not close the gaps. Organizations stall between findings and implementation when there is a lack of ownership of the process of operationalizing controls: writing procedures, training owners, collecting evidence, running reviews.

GuidePoint Security Compliance Program Implementation Support embeds that ownership into your program and executes alongside your team, so controls function in practice, evidence accumulates automatically, and your certification audit has a clear path to completion.

With GuidePoint, organizations gain:

- **Fewer non-conformities** that delay certification
- **A documented control set** that the team can operate day-to-day
- **Clear accountability** for every control owner
- **Audit evidence that accumulates** through recurring activities
- **A program the team maintains independently** after the engagement ends
- **Comprehensive cybersecurity expertise** to address technical gaps and related compliance activities

Stronger Together. Protecting What's Next.

Working with GuidePoint, your organization will be backed by our elite team of highly trained cybersecurity engineers, architects and consultants who come from organizations of all sizes, including Fortune 100 companies, the Department of War, and the U.S. Intelligence Community.

The Path to a Stronger Compliance Foundation

Every engagement starts with an initial triage. We review your current compliance status against the standard in question, including prior gap assessments, existing policies, charters, and scope documents, and agree on specific activities, deliverables, and timeline. Our full scope of services include:

Control Implementation

Assist with remediation of identified control activity gaps measured against the standards.

Includes:

- Policy and procedure development
- Control owner education
- Evidence tracking and reporting configuration

Operational Support

Oversee and support the client's execution of the key recurring activities that generate audit evidence over time.

Includes:

- Recurring control execution
- Evidence collection
- Corrective action tracking
- Policy re-approval management

Certification Support

Support the internal review process that takes your team from readiness through audit completion.

Includes:

- Internal readiness assessment
- Auditor evaluation and selection support
- Audit participation
- Evidence review

Why GuidePoint Security

When cyber threats hit, you want the best on your side. GuidePoint Security helps organizations assess, prioritize, and strengthen their cybersecurity capabilities through tailored assessments and actionable improvement roadmaps. We bring together cybersecurity expertise, technology, and operational experience to help organizations reduce risk, optimize investments, and build measurable, sustainable compliance programs.

About Us

GuidePoint Security brings together proven expertise, great relationships, and leading technologies to solve our client's most complex cybersecurity challenges. As a trusted cybersecurity advisor and partner, GuidePoint keeps people, data, and operations safe. We deliver tailored cybersecurity services that adapt to safeguard the nation's leading organizations today and provide complete confidence in their cybersecurity tomorrow. Stronger Together. Protecting What's Next.
